

NORSPRAY® Stripers

The NORSPRAY® professional striping units have been developed to meet the various striping needs in a wide range of configurations.

The different models offer the possibility of efficiently and rapidly striping parking places, pavements, straight lines or curbs, sports' fields...

All the professional striping contractors, as well as the technical services of small and larger cities, will easily find the striping equipment the best suited to their needs in the NORSPRAY® striping range.

Being all-purpose, the NORSPRAY® striping units enable companies that are not specialized in striping to use the equipment as a normal paint spray pump, for all typical building paint spray jobs.

All NORSPRAY® professional striping units are equipped with gasoline-driven HONDA® engines, offering very high performance and complete independence.
